

CENTRE FOR RENEWABLE &
SUSTAINABLE ENERGY STUDIES

Energy Storage

Date: 7 – 11 September 2020

Venue: Room K302, 3rd floor, Faculty of Engineering, Stellenbosch University, Stellenbosch

Registration: [CLICK HERE TO REGISTER](#)

Course fees: R11 400

Presenter:

Prof. Bladergroen completed his chemical engineering degree at the University of Twente (NL) before he joined the University of the Western Cape (UWC) in 1998 as a PhD student. After some time as postdoctoral fellow he was appointment as research manager for industrial contract research in 2005. From 2007 Prof Bladergroen accepted his role as the deputy director of the South African Institute for Advanced Materials Chemistry. Prof Bladergroen is currently heading the Energy Storage Innovation Laboratory (ESIL) which was created in 2015 as a platform to commercialize emerging technologies in partnership with local businesses.

Synopsis

The objective is to enable participants to understand the concepts and technologies used for electric Energy Storage (ES). The course highlights Lithium Ion (Li-ion) batteries as the dominant technology in new projects and addresses the complex safety, performance and life issues of this technology. We will discuss the technical and financial parameters that drive the project designs of grid-connected and off-grid ES. Participants will become familiar with the major factors that determine Energy Storage selection and sizing, and receive various case studies to use for benchmarking. The module aims to provide professionals with sufficient understanding to establish the key requirements and financial benefits of Energy Storage technology and applications in various grid-connected and off-grid systems.

Who should attend

Any person or organization that needs to learn more about electrical systems, integration of renewable energy supply, and electricity planning will benefit from this course.

Certification and Accreditation

The module has been registered with the Engineering Council of South Africa for 4 Continuous Professional Development points. A Certificate of Attendance will be awarded to all participants who attend the full course.

Venue and Time

This course will be presented at the Department of Electrical Engineering, Faculty of Engineering, Stellenbosch University and will run Mo-Fri & Sa from 08:00 to 18:00 on 7 - 11 September 2020. Directions can be obtained from: crses@sun.ac.za or <http://crses.sun.ac.za/contact-us>.

Travel and Accommodation

All travel arrangements are for your own account. Call the Stellenbosch Information Bureau on 021 883 3584 for accommodation near the university. You can request a list of available guesthouses from crses@sun.ac.za.

Registration

The course is designed for a restricted number of attendees so as to personalize and maximize the learning experience. Bookings will be taken on a first come first served basis.

Registration close: 24 August 2020

Course Fees

- Cancellations made up to and including 24 August 2020 will be subject to a 15% handling fee. No refunds will be made after this date; however, substitutions will be accepted.
- Payment is mandatory for attendance.
- In the case of unforeseen circumstances, Stellenbosch University reserves the right to cancel the course or change the lecturer, in which case all fees will be reimbursed in full, on request.
- The course fee includes all study material, tea/coffee, and lunch.
